Alle porter er priset med SL 32 beslag, minimum 28 cm overhøyde + 4 cm til portåpner. Torsjonsfjær med fjærbruddsikring i forkant, sammenhengende karmvinkel med tettelister langs sidekarmer og kraftig gummitetting i bunn og topp. Se side 19 for beslag tilpasset andre overhøyder og nødvendig sideklaring. Priser er uten lås.

GTFS og GTFS2 anbefales ikke i bredder over 400 cm dersom porten blir utsatt for sterkt sollys. Direkte sollys kan føre til utvidelse av portelementene og kan gjøre porten vanskelig å åpne. Av erfaring er GTTM bedre i disse tilfeller eller lysere farger.
